Hi Mike,

I talked with Ann at the State Treasurer and Zions will not accept the check we received (\$58,700) without the W9 Form. It's been extremely difficult for Zions to get the operator's to sign the form, so in an attempt to get the needed documents they will not accept the cash unless we have a signed W9. I have attached a blank copy of the form in hopes that you can get it to the operator. Thanks.

Dan,  
On top of SHPO, we need you to take care of this matter regarding the bond. Eventually, we'll get this permit off the ground.

Thanks,

Dan,

Regarding my previous email with the W9 form, maybe this can make things a little easier. This is a link to the IRS web site with a fillable PDF W9 form:

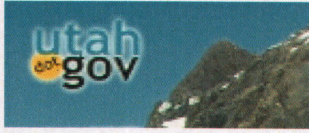

<http://www.irs.gov/pub/irs-pdf/fw9.pdf>

Looks like you can fill it out on your PC, print it off and sign it. Maybe even forward this to your office and your Admin Assistant can fill it out for you. When complete and signed, send the form to the Division of Oil, Gas and Mining, attention Penny Berry. She will take it to the State Treasurer with the check so they can deposit it.

Thanks!

Okay. I had wondered about the Queen mine . . .

On Tue, Nov 4, 2014 at 1:37 PM, Christopher Merritt <cmerritt@utah.gov> wrote:

Hi Paul,

Two things I want to get on your radar.

1) As is probably not surprising, I cannot and will not concur with the most recent eligibilities for the Kennecott project expansion down by Butterfield. The Queen Mine is clearly eligible, and those that wrote this report are probably the only archaeologists in a three-state radius to call it 'not eligible'. So expect that.

2) Pine Ridge Rock. I appreciate that they hired an archaeologist to conduct a Class I, but the problem is that NONE of the APE has been inventoried. It looks like the single site was located for fun back in 1981 with extremely little description. The site form mentions that there might be a prehistoric quarry in the vicinity as well, so it makes me nervous to sign off on that limited information.

I will be requesting a cultural resources inventory for the property, but given the time of year, it will be tight to get someone out there before winter...

Just an FYI...

Chris

Dan,

FYI, see forwarded comments from Christopher Merritt at SHPO regarding Pine Ridge Rock. I would suggest you get Sagebrush back out there to do the required inventory ASAP before winter makes it impossible. Paul Baker and I agree that you shouldn't have Sagebrush inventory the already disturbed areas, just where you plan to expand operations into in the future.

We were going to approve the permit under the condition that you avoid disturbing any areas identified in the

Class I report, but that can't happen yet based on these comments from SHPO. So please get Sagebrush or somebody out there as soon as you can to do the full inventory before the snow flies.

Thanks,

To: mpolk@sagebrushconsultants.com, dan@pineridgeutah.com

Hi Dan & Mike

Attached is the email with SHPO's comments (edited to remove references to another project). In his email, Chris Merritt said he will want "a cultural resources inventory for the property." However, we haven't received his official response letter yet where he probably tells us what he expects. Mike, you may need to contact Chris to see exactly what he wants. Dan, I stated in my email to you that you should only have an inventory done on areas you want to move your operation in to, not areas that are already disturbed. You'll need to provide that to Sagebrush. This time, include the immediate vicinity around your staging area west of the road. That is OGM's input into what's needed.

How this works on our end is we review the inventory and determine if, in our judgement, there will be any potential impacts. If we don't think there will be any impacts, we will write a letter to SHPO, they will respond with a concurrence letter for the file, and we can approve the NOI. If it looks like there is potential for impacts, we will write a different letter that will recommend avoidance of any identified CR's, and/or require a Management Plan or Protection Plan for our approval. Then we will forward that with a cover letter to SHPO for approval from them. Then we will incorporate that into the NOI and approve it.

Mike and Dan, let me know if you have any questions.

Thanks,

Mike Bradley

Mike in your opinion should we survey the land we intend to move into over the foreseeable future as indicated on the map we provided via sagebrush. I believe the 320 acres or two quarter sections. and include the area were we take steps outside the gate? I believe that is the area Mr. Polk and I had planned for next week. With the exception of disturbed areas and the addition of the acreage around our collection area outside the gate. In mind it would cover us well into the foreseeable future. thks Dan

Dan,  
I would probably get surveyed whatever land you are under lease agreement with and foresee disturbing going into the future. Might as well get it all done now so you don't have to keep waking up this issue.

yes. I hoping with some 40's this week we can get it done over the next couple of weeks. Surely we will have a melt between now and the end of the year. Currently we have about 5 inches at the quarry.
